

The house of the Good Shepherd is happy to announce a Request for Proposal to install Exterior Doors, Bollards and a walk-through Metal Detector on our 1550 Champlain Avenue Campus in Utica NY.

HGS has been providing care for foster children in the Central New York region for over 150 years. We have a residential campus in Utica NY that consists of a School and 5 residential buildings where our foster children live. We are inviting Contractors to submit bids to install more secure exterior doors, protective bollards and a walk-through metal detectors on the campus. Installation should be accomplished while children are in residence and residential installation can take place while the children are in school. Some of our children have behavioral and psychiatric disorders and in this context keeping all materials, equipment and tools secure at all times is required.

Pricing should be clear and include detailed line items for equipment, software and labor.

Evaluation Criteria:

Price

Fit between RFP and Bid

Prior Experience with Vendor (referrals)

Reliability - reputation
